Watch the Quadrantid Meteor Shower Peak LIVE on Slooh

The first major meteor shower of the new year is upon us, as the Quadrantids prepare to peak on the night of January 3rd. Join Slooh for a LIVE show featuring fascinating meteor facts, a look at the mythology of the constellation from which these meteors originate, and, of course LIVE views of meteors from around the world.

On Sunday, January 3rd, at 4 PM PST / 7 PM EST / 00:00 UTC (1/4) ([International Times](#)), join Slooh host, Paul Cox, along with Slooh Astronomers, Bob Berman and Will Gater, with some meteorological support from The Weather Network's Scott Sutherland, as they take viewers on an all night meteor adventure. We'll have live meteor feeds from five countries on four continents, along with a fascinating way to hear meteors, even if you can't see them. No matter the weather in your neck of the woods, we'll have a way for you to see clear skies.

Viewers are encouraged to go outside and bring Slooh along, as our live meteor feeds from countries around the world, ongoing commentary and musical interludes are a great accompaniment to a night of outdoor star-gazing.

Viewers can use @Slooh on Twitter to participate in all the meteor shower action, ask questions during the show, chat with our hosts and guests, and even report their own sightings or share images and stories.

Quadrantids Broadcast:

Start time: Sunday, January 3rd, at 4 PM PST / 7 PM EST / 00:00 UTC (1/4)
([International Times](#))

Where: Go to Slooh.com to join and watch this broadcast live and gain access to Slooh's

large archive of past shows.

Slooh Media Policy:

We own all copyright to the text, images, photographs, video, audio, graphics, user interface, and other content provided on Slooh live broadcasts. At times, we may include additional content from NASA or other official partners to help explain what's happening in the live image feed. A Slooh watermark will be included on our live feed. Slooh may run a house ad prior, during, or after any broadcast to highlight the Slooh Community. You may embed our feeds into your coverage so long as "Courtesy of Slooh" is located next to the feed with a link back to www.slooh.com. You may not embed Slooh's coverage in web pages that include footage or links to other live coverage. You may not alter or modify our broadcast in any way, unless provided with written permission to do so.

About Slooh

Slooh enables people to explore the universe together through its global network of telescopes. Since 2003, Slooh's automated observatories have processed celestial images in real-time for broadcast to the Internet. Slooh's technology is protected by Patent No.: US 7,194,146 B2 which was awarded in 2006. Slooh members have taken over 4m photos/500,000 FITS images of over 50,000 celestial objects, participated in numerous discoveries with leading astronomical institutions and made over 3,000 submissions to the Minor Planet Center. Slooh's flagship observatories are situated on Mt. Teide, in partnership with the Institute of Astrophysics of the Canary Islands (IAC), and in Chile, in partnership with the Catholic University. Slooh has also broadcast live celestial events from partner observatories in Arizona, Japan, Hawaii, Cypress, Dubai, South Africa, Australia, New Zealand, Norway and many more. Slooh's free live broadcasts of potentially hazardous asteroids (PHAs), comets, transits, eclipses, solar activity etc. feature narration by astronomy experts Bob Berman, Paul Cox and Will Gater and are syndicated to media outlets worldwide. Slooh signed a Space Act Agreement with NASA in March 2014 to "Bring the Universe to Everyone and Help Protect Earth, Too."
